

EFIT-V training course

January 12th – 14th 2009

VisionMetric Ltd, Canterbury Enterprise Hub, University of Kent

About the course: This 3 day course will cover all key aspects relating to the effective production of facial composites using EFIT-V¹.

- ❖ Comprehensive training in the EFIT-V software package
- ❖ Effective use of associated paint package
- ❖ The understanding of facial proportions and simple drawing and shading techniques
- ❖ Interview and construction methodology using EFIT-V.
- ❖ Practice sessions using real witnesses to constructed scenarios.

The training course will be conducted in accordance with the current guidelines from the ACPO facial ID group and National Occupational Standards.

Who is it for? The course is primarily intended for those with previous experience of E-FIT or similar software.

Location: The course will take place within purpose-built, training facilities at Canterbury Enterprise Hub, Kent University. The training centre is equipped with modern laptop computers², electronic whiteboard and computer projector along with full audio and video recording services.

Registration: Registration on the course can be made by completing the attached registration form and returning to VisionMetric as indicated on the form.

Cost: The cost for the course is £699 per delegate. The cost includes –

- ❖ All course materials
- ❖ Hotel accommodation (including breakfast) in the city of Canterbury for the nights of Sunday-Tuesday (Sunday Jan 11th to Tuesday 13th Jan)
- ❖ Lunch and refreshments at the University of Kent.
 - Evening meals are NOT included in this cost.

Cancellation: Full refunds will be made for cancellations made up to 1 month before start. A cancellation fee of 20% will be charged for cancellations after this date. VisionMetric reserve the right to charge full fees for no-shows.

Contact Us: For further enquiries about the course contact the VisionMetric office manager Beverley-June Higgins (01227 824667) bev.higgins@visionmetric.com or the training coordinator Dr Chris Solomon (chris.solomon@visionmetric.com)

VisionMetric Ltd reserves the right to cancel the course should there be insufficient subscription. In this case, delegates will generally be notified a minimum of 3 weeks in advance and all registration costs will be returned.

¹ The cognitive interview technique will not be covered in this course.

² Delegates may bring their own computers if they wish but these must be virus-free and will be subjected to virus scans prior to their use on the course.
